SUMMARY

A passionate voice actor coming from a previous life of an IT Security professional, I cover the voice spectrum from the warm, confident and tenured business delivery to the crazy, dynamic and entertaining characters you find in many of today's animated series. Through extensive training I've adapted my millennial sound to cover the genuine, conversational tone required in much of today's most requested projects.

From my personal studio I can provide quick, quality turnaround with fully edited audio in whatever format is desired (aiff, mp3, wav). I can connect with you via SourceConnect, Zoom, Phone or email. Take advantage of my versatile range and authentic reads that connect with your listeners. I can have content back to you in hours in most cases.
